KAMINIORA - Equilibre - Class Retail EUR

(ISIN: NO ISIN) Equilibre (the 'Fund') is a Sub-Fund of KAMINIORA (the 'Company').

Lemanik Asset Management S.A. is the Management Company (the 'Management Company') to the Fund.

Objectives and Investment Policy

- The investment objective of the Sub-Fund is to seek capital appreciation over the long term through a flexible, active and opportunistic allocation of assets. As a result, the Sub-Fund may alternatively adopt an offensive or defensive investment strategy based on market conditions and opportunities.
- In order to achieve this objective, the Sub-Fund will invest predominantly in Investment Funds investing in equity and equity related securities, debt instruments, currencies and Money-Market Instruments in varying proportions depending on market opportunities. In any event, the Sub-Fund will not invest more than 60% of its assets in equity and equity related securities.
- The Sub-Fund's investments will be determined on a discretionary basis, using both a technical and a "top-down" analysis of the markets and will not be constrained by any geographical, sectorial or currency limitations.
- Depending on market conditions and opportunities, the Sub-Fund may hold up to 49% of its net assets in cash or cash equivalents.
- The Fund may use Financial Derivatives Instruments (instruments whose prices are dependent on one or more underlying assets 'FDIs'). The Fund invests in FDIs in order to reduce the possibility of financial losses or to achieve higher gains. The Fund is expected to have an increased market exposure as a result of such investments.
- Purchase and sale of shares in the Fund can be made on a daily basis.
- Any income arising from the Fund's investments is reflected in the value of your shares as all income is reinvested rather than being paid out.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and Reward Profile

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.
- This fund is in category 5, since the share price has a quite high volatility therefore the risk of loss as well as the expected reward can be medium to high.

The following risks may not be fully captured by the risk and reward indicator:

- Equity Risk: The risk that investments depreciate because of stock market dynamics.
- Market Risk: The Fund's assets may decrease because of sovereign acts and political transformation, which may also influence free trade of currency. In addition, risks may arise because of restricted information possibilities in addition to less stringent supervision and control of certain markets. The performance of these markets may be subject to significant volatility.

A complete description of risk factors is set out in the Prospectus in the section entitled 'Specific risks'.
