What is this product?

TYPE OF PRODUCT

The product is a Fund of Kaminiora, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

OBJECTIVES

The investment objective of the Fund is to seek capital appreciation over the long term through a flexible, active and opportunistic allocation of assets. As a result, the Fund may alternatively adopt an offensive or defensive investment strategy based on market conditions and opportunities.

In order to achieve this objective, the Fund will invest predominantly in Investment Funds investing in equity and equity related securities, debt instruments, currencies and Money Market Instruments in varying proportions depending on market opportunities. In any event, the Fund will not invest more than 60% of its assets in equity and equity related securities.

The Fund's investments will be determined on a discretionary basis, using both a technical and a "top-down" analysis of the markets and will not be constrained by any geographical, sectorial or currency limitations.

Depending on market conditions and opportunities, the Fund may hold up to 49% of its net assets in cash or cash equivalents.

The Fund may use Financial Derivatives Instruments (instruments whose prices are dependent on one or more underlying assets 'FDIs'). The Fund invests in FDIs in order to reduce the possibility of financial losses or to achieve higher gains. The Fund is expected to have an increased market exposure as a result of such investments.

The Fund is actively managed without any reference to a benchmark. The Investment Manager has discretion over the composition of its portfolio subject to this objective and investment policy.

Sale of shares in the Fund can be made on a daily basis.

Any income arising from the Fund's investments is reflected in the value of your shares as all income is reinvested rather than being paid out.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

INTENDED RETAIL INVESTORS

The product is reserved for institutional investors. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment		5 years EUR 10 000		
		If you exit after 1 year	If you exit after 5 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs Average return each year	EUR 7 050 -29.5%	EUR 4 530 -14.7%	
Unfavourable scenario	What you might get back after costs Average return each year	EUR 7 880 -21.2%	EUR 7 800 -4.9%	This type of scenario occurred for an investment in the product between August 2021 and December 2022.
Moderate scenario	What you might get back after costs Average return each year	EUR 10 160 1.6%	EUR 11 270 2.4%	This type of scenario occurred for an investment in the proxy then the product between December 2014 and December 2019.
Favourable scenario	What you might get back after costs Average return each year	EUR 13 060 30.6%	EUR 13 750 6.6%	This type of scenario occurred for an investment in the product between October 2016 and October 2021.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Lemanik Asset Management S.A. is unable to pay out?

Lemanik Asset Management S.A. is not making any payment to you in relation to this Fund and you would still be paid in case of a default from Lemanik Asset Management S.A..

The Fund's assets are held with RBC Investor Services Bank S.A. and are segregated from the assets of other Sub-funds of the Company. The assets of the Fund cannot be used to pay the debts of other Sub-funds of the Company.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 388	EUR 854
Annual cost impact (*)	3.9%	1.5%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.9% before costs and 2.4% after costs.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.
